ELSEVIER

Journal of Membrane Science 102 (1995) 243–244

journal of MEMBRANE SCIENCE

Contents

Special Issue: *Engineering of Membrane Processes II, Environmental Applications*

Preface vii
Break-up of oil-in-water emulsions induced by permeation through a microfiltration membrane
M. Hlavacek (Kensington, NSW, Australia) 1
Separation of glycol and water from coolant liquids by evaporation, reverse osmosis and pervaporation
W. Jehle, Th. Staneff, B. Wagner and J. Steinwandel (Friedrichshafen, Germany) 9
Design of hybrid distillation and vapor permeation processes
T. Pettersen and K.M. Lien (Trondheim, Norway) 21
A helical baffle for cross-flow microfiltration
B.B. Gupta, J.A. Howell, D. Wu and R.W. Field (Bath, UK) 31
Removal and recovery of phenol from FCC effluent
T. Kojima, K. Nishijima and M. Matsukata (Tokyo, Japan) 43
Selective permeation of metal ions through cation exchange membrane carrying *N*-(8-quinolyl)-sulfonamide as a chelating ligand
T. Kojima, T. Takano and T. Komiyama (Tokyo, Japan) 49
Cross-flow ultrafiltration of hydrocarbon emulsions
R. Villarroel López, S. Elmaleh and N. Ghaffor (Montpellier, France) 55
Virus removal from water and wastewater using membranes
S.S. Madaeni, A.G. Fane (Sydney, NSW, Australia) and G.S. Grohmann (West Ryde, NSW, Australia) 65
Economic assessment of membrane processes for water and waste water treatment
G. Owen, M. Bandi, J.A. Howell and S.J. Churchouse (Bath, UK) 77
Nitrogen separation from domestic wastewater by reverse osmosis
T. Bilstad (Stavanger, Norway) 93
Water and solute solubilization and transport in emulsion liquid membranes
H.J. Bart (Kaiserslautern, Germany), H. Jüngling, N. Ramaseder and R. Marr (Graz, Austria) 103
Study on the concentration of acids by membrane distillation
M. Tomaszewska, M. Gryta and A.W. Morawski (Szczecin, Poland) 113
Rejection of mineral salts on a gamma alumina nanofiltration membrane Application to environmental process
S. Alami-Younssi, A. Larbot, M. Persin, J. Sarrazin and L. Cot (Montpellier, France) 123
CoPVDF membranes for protection of cultural heritages
E. Drioli, R. Gagliardi, L. Donato and A. Checchetti (Arcavacata di Rende Cs, Italy) 131
Pre-industrial experience in advanced oxidation and integral photodegradation of organics in potable waters and waste waters by PHOTOPERM™ membranes immobilizing titanium dioxide and promoting photocatalysts
I.R. Bellobono, B. Barni and F. Gianturco (Milano, Italy) 139
A comparative study on the application of membrane technology to the public water supply
S. Kunikane, Y. Magara, M. Itoh and O. Tanaka (Tokyo, Japan) 149
The role of ultrafiltration and nanofiltration on the minimisation of the environmental impact of bleached pulp effluents
M.J. Rosa and M.N.d. Pinho (Lisboa Codex, Portugal) 155
Modelling of nanofiltration applied to the recovery of salt from waste brine at a sugar decolourisation plant
S. Wadley, C.J. Brouckaert, L.A.D. Baddock and C.A. Buckley (Durban, South Africa) 163
Modeling and simulation of counterflow (W/O) emulsion spray columns for removal of phenol from dilute aqueous solutions
T. Kinugasa, K. Watanabe, T. Utunomiya (Niihama, Japan) and H. Takeuchi (Nagoya, Japan) 177
Simulation of membrane separation by neural networks
H. Niemi, A. Bulsari and S. Palosaari (Lappeenranta, Finland) 185

Cross-flow and dead-end microfiltration of oily-water emulsion. Part I: Experimental study and analysis of flux decline
A.B. Koltuniewicz (Wroclaw, Poland), R.W. Field and T.C. Arnot (Bath, United Kingdom) 193
Process water recovery from pulp bleaching effluents by an NF/ED hybrid process
V. Geraldes and M.N.d. Pinho (Lisboa Codex, Portugal) 209
The ultrafiltration of viscous fluids
M. Pritchard, J.A. Howell and R.W. Field (Bath, United Kingdom) 223
